```
import pandas as pd
import matplotlib.pyplot as plt

data = {
    'Student':['A','B','C','D','E'],
    'Math':[80,60,90,70,50],
    'Science':[75,65,85,72,55],
    'English':[85,70,88,75,60],
    'Hours_Study':[4,3,6,4,2]
}

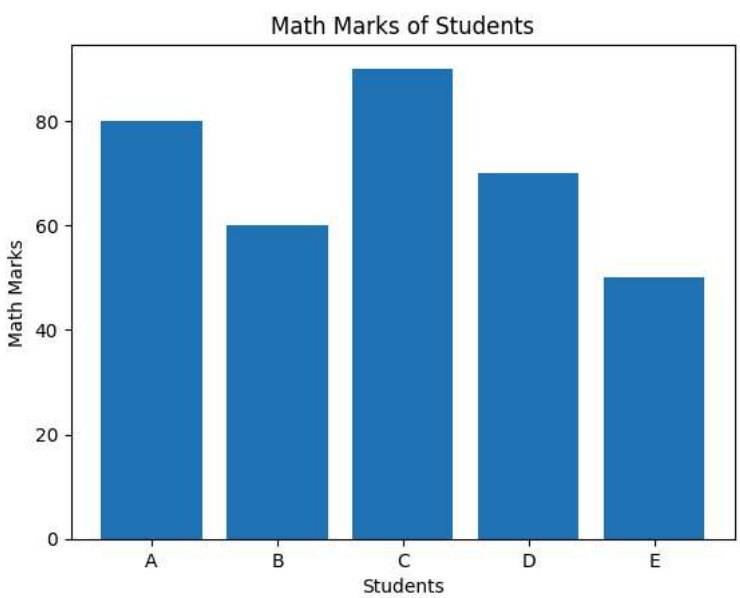
df = pd.DataFrame(data)
df
```

	Student	Math	Science	English	Hours_Study
0	A	80	75	85	4
1	B	60	65	70	3
2	C	90	85	88	6
3	D	70	72	75	4
4	E	50	55	60	2

Next steps: Generate code with df New interactive sheet

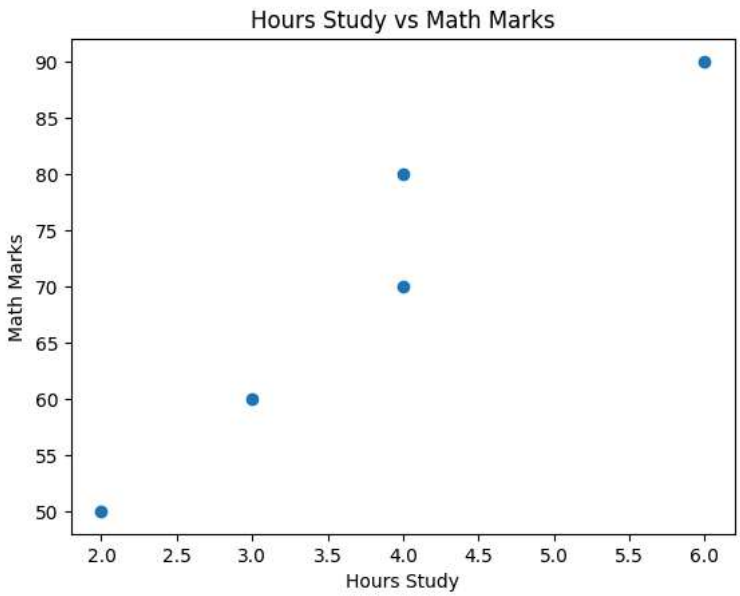
a) Create a chart that shows Math marks of all students

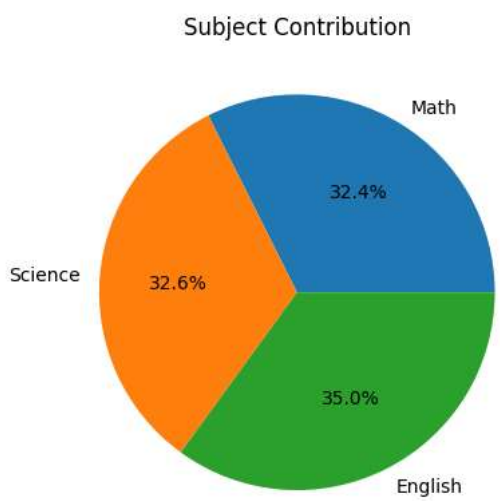
```
plt.figure()
plt.bar(df['Student'], df['Math'])
plt.xlabel("Students")
plt.ylabel("Math Marks")
plt.title("Math Marks of Students")
plt.show()
```



b) Create a chart that shows relationship between Hours_Study and Math marks

```
plt.figure()
plt.scatter(df['Hours_Study'], df['Math'])
plt.xlabel("Hours Study")
plt.ylabel("Math Marks")
plt.title("Hours Study vs Math Marks")
plt.show()
```



c) Create a pie chart showing percentage contribution of total marks of each subject.


```
totals = [df['Math'].sum(), df['Science'].sum(), df['English'].sum()]
subjects = ['Math','Science','English']

plt.figure()
plt.pie(totals, labels=subjects, autopct='%1.1f%%')
plt.title("Subject Contribution")
plt.show()
```
